

NadaRuns

Driver User Guide

How to earn with NadaRuns — from sign-up to payout

What is NadaRuns?

- ▶ NadaRuns is a B2B logistics marketplace that matches empty vehicle capacity and return trips with freight that needs to move.
- ▶ As a driver or carrier, you earn from kilometers you would otherwise drive empty.
- ▶ Works for solo drivers and for fleet/transport companies managing multiple vehicles.

TIP: You only need a smartphone, a vehicle, and valid documents to start.

Download & Register

- ▶ Install the NadaRuns Driver app and tap 'Register'.
- ▶ Choose your account type: Individual driver or Fleet / Company.
- ▶ Enter your name, contact details and (for fleets) your company name and business ID.
- ▶ Select your vehicle type (van, truck, semi-truck, tanker, etc.), licence class and registration plate.

TIP: Fleet owners automatically get a company workspace to manage drivers and vehicles.

Verify Your Identity (KYC)

- ▶ Upload the required documents: driving licence, vehicle registration and insurance.
- ▶ Our team reviews and approves your account, usually within a short time.
- ▶ You'll receive an email once you are approved (or if something needs fixing).

TIP: You must be approved before you can accept jobs — this keeps the marketplace trusted.

Go Online & See Your Dashboard

- ▶ Toggle 'Online' on the home screen to start receiving job requests.
- ▶ Your dashboard shows today's earnings, completed deliveries and acceptance rate.
- ▶ The live map shows your location and nearby available jobs.

TIP: Toggle 'Offline' anytime to stop receiving new requests.

Receive & Accept Jobs

- ▶ New job requests appear as a card over the map with pickup, drop-off, distance, payout and ETA.
- ▶ Review the details and tap Accept to take the job, or Decline to pass.
- ▶ Once accepted, the job is reserved for you and navigation begins.

TIP: Higher acceptance rates and ratings help you get more offers.

Pick Up the Cargo

- ▶ Follow the in-app route to the pickup location.
- ▶ On arrival, confirm pickup by entering the 4-digit pickup code (OTP).
- ▶ Take a Proof-of-Pickup photo of the loaded cargo.

TIP: The OTP and photo protect both you and the shipper against disputes.

Deliver the Cargo

- ▶ Navigate to the drop-off location shown in the app.
- ▶ Confirm delivery with the 4-digit delivery code (OTP).
- ▶ Take a Proof-of-Delivery photo to complete the job.

TIP: After delivery you'll see an animated earnings summary for the trip.

Earnings & Wallet

- ▶ The Wallet tab shows your Available and Pending balances.
- ▶ Earnings clear from Pending to Available after a short clearance window.
- ▶ Request a withdrawal (cash out) when you're ready — an invoice/receipt PDF is generated automatically.

TIP: All payment receipts and withdrawal documents are emailed and stored for you.

Delivery History

- ▶ The History tab lists every completed delivery with date, route and payout.
- ▶ Use it to track your lifetime earnings and performance.

Fleet Management (Company Owners)

- ▶ Open Settings → Fleet to manage your company.
- ▶ Add and invite drivers, add vehicles and assign vehicles to drivers.
- ▶ Choose a job-acceptance mode: self-accept, owner-assign or hybrid.
- ▶ Track all company jobs, the company wallet and request payouts for approval.

TIP: Invited drivers simply log in with their own email and password.

Settings, Language & Support

- ▶ Update your profile, vehicle and notification preferences in Settings.
- ▶ Switch the app language between English and Finnish (Suomi) anytime.
- ▶ Find 'Help & Support' and 'Privacy & Terms' in your profile.
- ▶ Need help? Contact care@nadaruns.com.

TIP: Drive safe and turn those empty kilometers into income!
