

NadaRuns

Shipper User Guide

How to move freight with NadaRuns — from booking to delivery

What is NadaRuns?

- ▶ NadaRuns is a B2B logistics marketplace for moving freight using available transport capacity and return trips.
- ▶ As a business (shipper), you get faster, more competitive transport by tapping into vehicles that are already on the road.
- ▶ Ideal for pallets, part-loads, full loads and special cargo across Finland.

TIP: Less empty driving means lower cost for you and lower emissions overall.

Register Your Business

- ▶ Install the NadaRuns app and register as a Business / Shipper.
- ▶ Enter your company name and contact details.
- ▶ Log in to reach your shipper dashboard.

Create a Shipment

- ▶ Tap 'New' to start a shipment.
- ▶ Set pickup and drop-off locations on the map.
- ▶ Enter cargo details: weight, dimensions, pallet count and loading meters.
- ▶ Choose the required vehicle type and urgency.

TIP: Accurate cargo details give you the most accurate price and the right vehicle.

Understand Your Price

- ▶ Pricing follows the Finnish road-freight model based on chargeable freight weight.
- ▶ Chargeable weight is the greatest of actual weight, volume, pallet and loading-meter weight.
- ▶ The breakdown shows freight fee, distance, urgency and fuel surcharge.
- ▶ You get an instant estimate before you confirm.

TIP: Expand the 'Advanced' section to fine-tune pallets and dimensions.

Choose How to Pay

- ▶ Pay Now: pay securely by card (Stripe) right away.
- ▶ Accept Invoice: receive a Net-14 invoice (PDF) and pay later.
- ▶ Pay Later: confirm the shipment and settle afterwards.
- ▶ Saved cards enable one-tap instant payment for future orders.

TIP: Funds are captured on delivery, so you only pay for completed transport.

Track Your Shipment

- ▶ Watch live status updates: driver assigned, en route to pickup, picked up, delivering, delivered.
- ▶ See your assigned driver and estimated arrival on the map.

TIP: You'll also get email updates at key milestones.

Proof of Pickup & Delivery

- ▶ Each shipment shows a 'Proof of Pickup & Delivery' card.
- ▶ View the photo taken at pickup and the photo taken at delivery.
- ▶ Tap any photo to open it full screen.

TIP: POP/POD photos stay available in your order summary for your records.

Invoices & Receipts

- ▶ Payment receipts and invoices are generated automatically as PDFs.
- ▶ They are emailed to you and stored in the app for download anytime.

TIP: Great for accounting — every transaction has a document.

Saved Payment Methods

- ▶ Add and manage your cards under Settings → Payment Methods.
- ▶ Set a default card and remove old ones.
- ▶ Use one-tap 'Pay with saved card' for faster checkout.

Settings, Language & Support

- ▶ Manage your business profile and preferences in Settings.
- ▶ Switch the app language between English and Finnish (Suomi) anytime.
- ▶ Find 'Help & Support' and 'Privacy & Terms' in your profile.
- ▶ Need help? Contact care@nadaruns.com.

TIP: Move more freight, with less empty space on the road.
